

Project nr 2022-1-IT02-KA210-ADU-000082377

**Boosting lifelong learning awareness of EU Green Deal**

## PROJECT OBJECTIVES

*The project aims at:*

- **empowering** partner organizations as regards the delivering of the European Green Deal;
- **developing** competences of Partners, in the field of adult education and lifelong learning in order to:
- **favor** the alignment of their operations and strategies to the delivery of the European Green Deal, to bring bottom-up contribution in making Europe the first climate neutral continent in the world, while also making also adult education domain fit to meet this challenge on the path to reach EU climate targets in a fair, cost effective and competitive way;
- **raising** the awareness of the recipients of their learning provisions as regards the potential to transform our societies and our economy through the European Green Deal to enable behavioural changes for individual preferences

Co-funded by the Erasmus+ Programme of the European Union

## THE PROJECT

This small-scale partnership in adult education is rooted on the belief that Education organizations need to take action to respond to the climate emergency and planetary crisis both in terms of their own operations and strategies and, crucially, as regards the preparation of their targeted learners for the future.

Moreover, the Partners are convinced that the current severe crisis (covid pandemic, return of war in Europe) have given an acceleration to the necessity of transformation that were pre-existing, for instance as response to tackle climate change, to mitigate them and or adapt to them. In some field of education there's evidence of developing trends on greening, with many organizations already involved in initiatives on environmental sustainability on its mainstreaming in connection and crossfertilisation with other on-going transformation processes, such as for instance digitalisation, social inclusion and enhancement of learning and teaching.

## UPDATE OF COMPETENCES

*The main target group of the project are the trainers/teachers, management and staff in general within the Partner Organizations, active in the domain of lifelong learning and adult education, for which the challenge posed by the delivery of the EU Green Deal represent a valuable opportunity, in how to ensure the effective contribution of the educational sector towards the green transition. As in other sectors, adult education and lifelong learning organizations has to consider the beneficial potential in embracing, at least in part of its strains, the EU Green Deal as a way to equip its staff with new knowledge and skills which will be beneficial as a consequence to the targeted audience of learners as well as to the reference community.*

*In fact, when it comes to adult skills and training, there are several challenges to achieve a smooth green transition, since many adults, especially in disadvantaged areas may have low basic skills and this may be a major challenge for upskilling, reskilling and overall employment.*

The project was based on the implementation of three transnational project meetings **to Boost lifelong learning awareness of European Green Deal:**

### meeting 1:

21 January 2023, Ascoli Piceno (Italy): to introduce participants to the projects contents and practices to favor the alignment of their operations, strategies to deliver the EU Green Deal, while making the adult education domain fit to meet the challenge of EU climate targets in a fair and cost effective way

### meeting 2:

15 July 2023, Brussels (Belgium), to empower participants on the following EU Green Deal pillars: "Working with nature to protect our planet and health" and "Renovating buildings for greener lifestyles".

### meeting 3:

21 October 2023, Bucharest (Romania): to empower participants on the following EU Green Deal pillars: "Making transport sustainable for all", "Leading the third industrial revolution" and "Cleaning our energy system".
